

## **THRIFT**

DRAIN CLEANER

### **DESCRIPTION**

**THRIFT** drain cleaner is a non-acid formula that will not harm fine fixtures, chrome trim, plastic or metal pipes.

### **APPLICATIONS**

For small drains, grease traps, septic systems and root control.

### **TECHNICAL DATA**

<b>FORM:</b> Powder	<b>FLASH POINT:</b> Not combustible
<b>ODOUR:</b> Faint	<b>FLAME EXTENSION:</b> N/A
<b>COLOUR:</b> White	<b>SOLUBILITY IN WATER:</b> 100%
<b>DETERGENCY:</b> Good	<b>SPECIFIC GRAVITY:</b> 2.13g/ml
<b>TOXICITY:</b> Poison S6	<b>%VOLATILE BY VOLUME:</b> Nil
<b>WETTING ABILITY:</b> Excellent	<b>pH: (5% sol<sup>n</sup>)</b> 13
<b>STORAGE ABILITY:</b> 1 year +	<b>PROPELLANT:</b> Nil
<b>COLD STABILITY:</b> Good	<b>EVAPORATION RATE:</b> Nil
<b>PHOSPHATES:</b> Nil	<b>BIODEGRADABILITY:</b> No

### **DIRECTIONS FOR USE**

**SMALL DRAINS:** When fixtures begin to drain slowly it is usually due to the build up of grease, hair, soap scum or bath oils. To prevent complete stoppage, let **hot** water run to warm lines. Add one cup of **THRIFT** directly into drain opening. Let **hot** water run until all chemical is dissolved. Let stand one minute then flush with **hot** water. To keep drains working properly add ½ cup to 1 cup of **THRIFT** once per month. If drain is completely stopped use cable to open drain enough to allow water to flow then add **THRIFT** to ensure a clean and proper working drain.

**GREASE TRAPS:** A regular treatment of 2 x 453g of **THRIFT** for each 454L of capacity will greatly reduce the costly pumping and cleaning of your grease trap by keeping the grease and suspended solids in a liquid form allowing your grease trap to function properly. **THRIFT** may be applied at any drain leading to the grease trap. Pour in dry and follow with enough **hot** water to dissolve all chemical. Allow **THRIFT** to stand in grease traps as long as possible, overnight for maximum results.

**SEPTIC TANKS:** **THRIFT** has no equal when it comes to maintaining a septic system and keeping it in a proper working condition. To prevent costly pumping expense, use 6 x 453g tubs of **THRIFT** to start immediate bacteria action in a 2270L capacity septic tank. Add 6 x 453g tubs of **THRIFT** once a year to prevent the build up of grease, solid waste and root growth in system. This will insure a proper working drain field and prevent costly repair or replacement. Proven effective and satisfying professionals for over 50 years.
